

Instructions for students

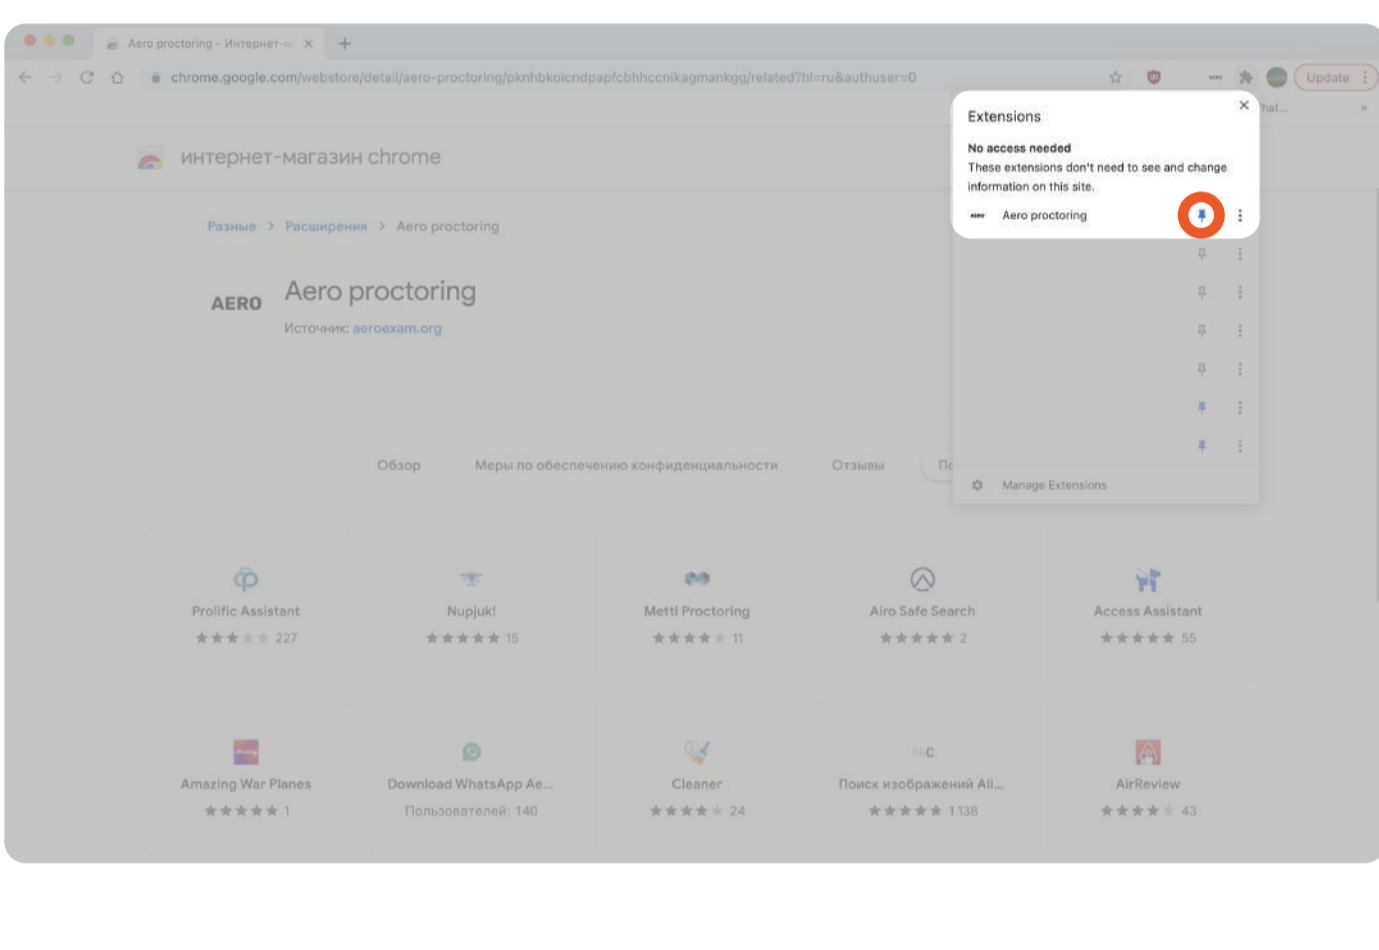

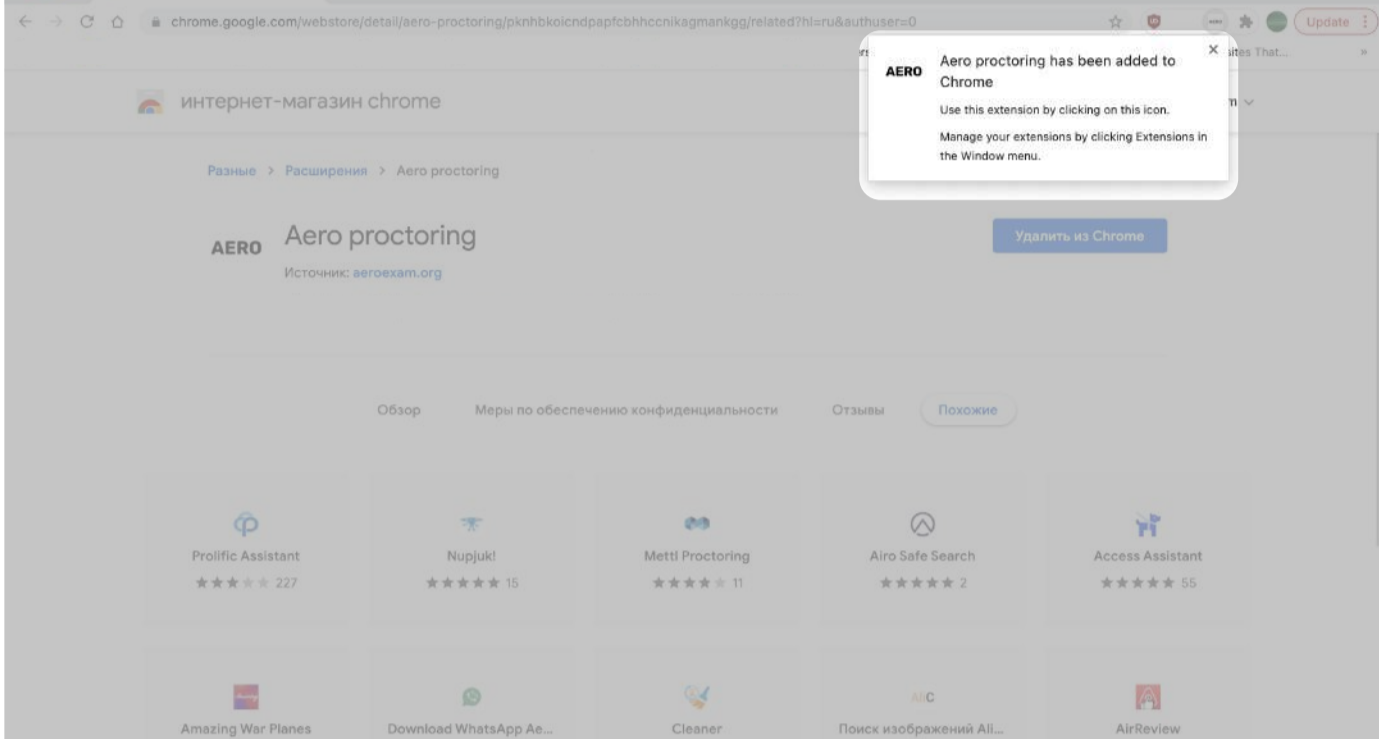

For system to work correctly, you need to download [Google Chrome](#) browser (if installed, update to the latest version)

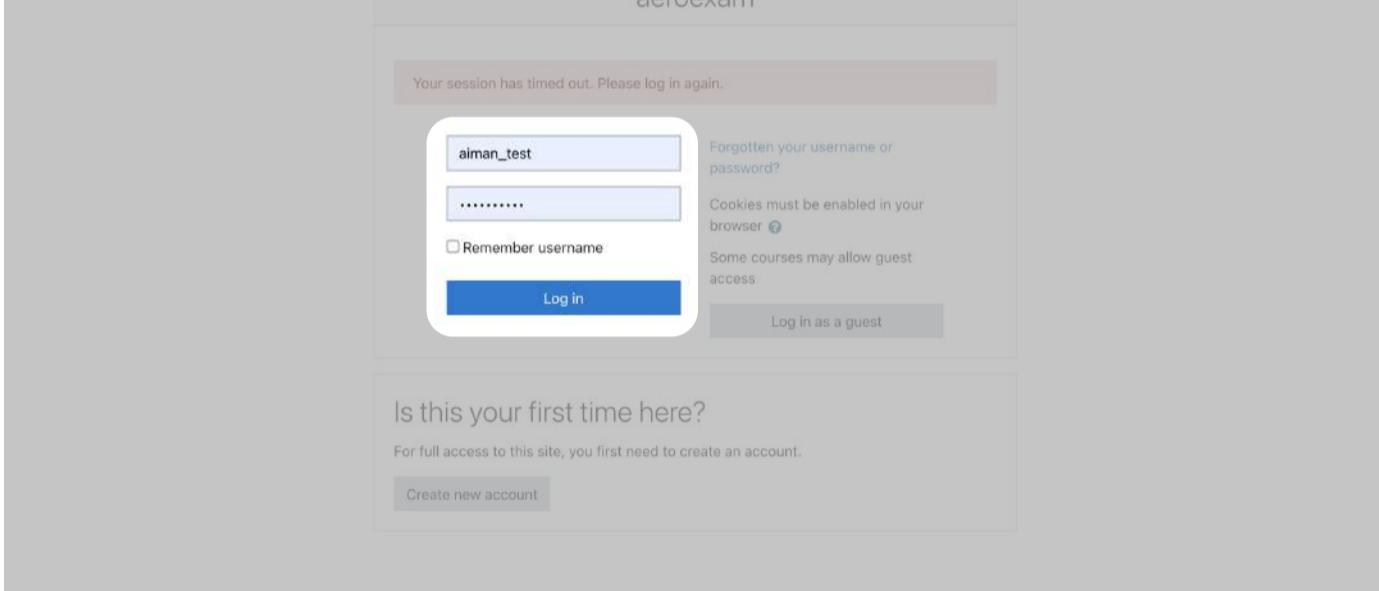

Next, install the **Aero Proctoring browser extension** following this link: [here](#)

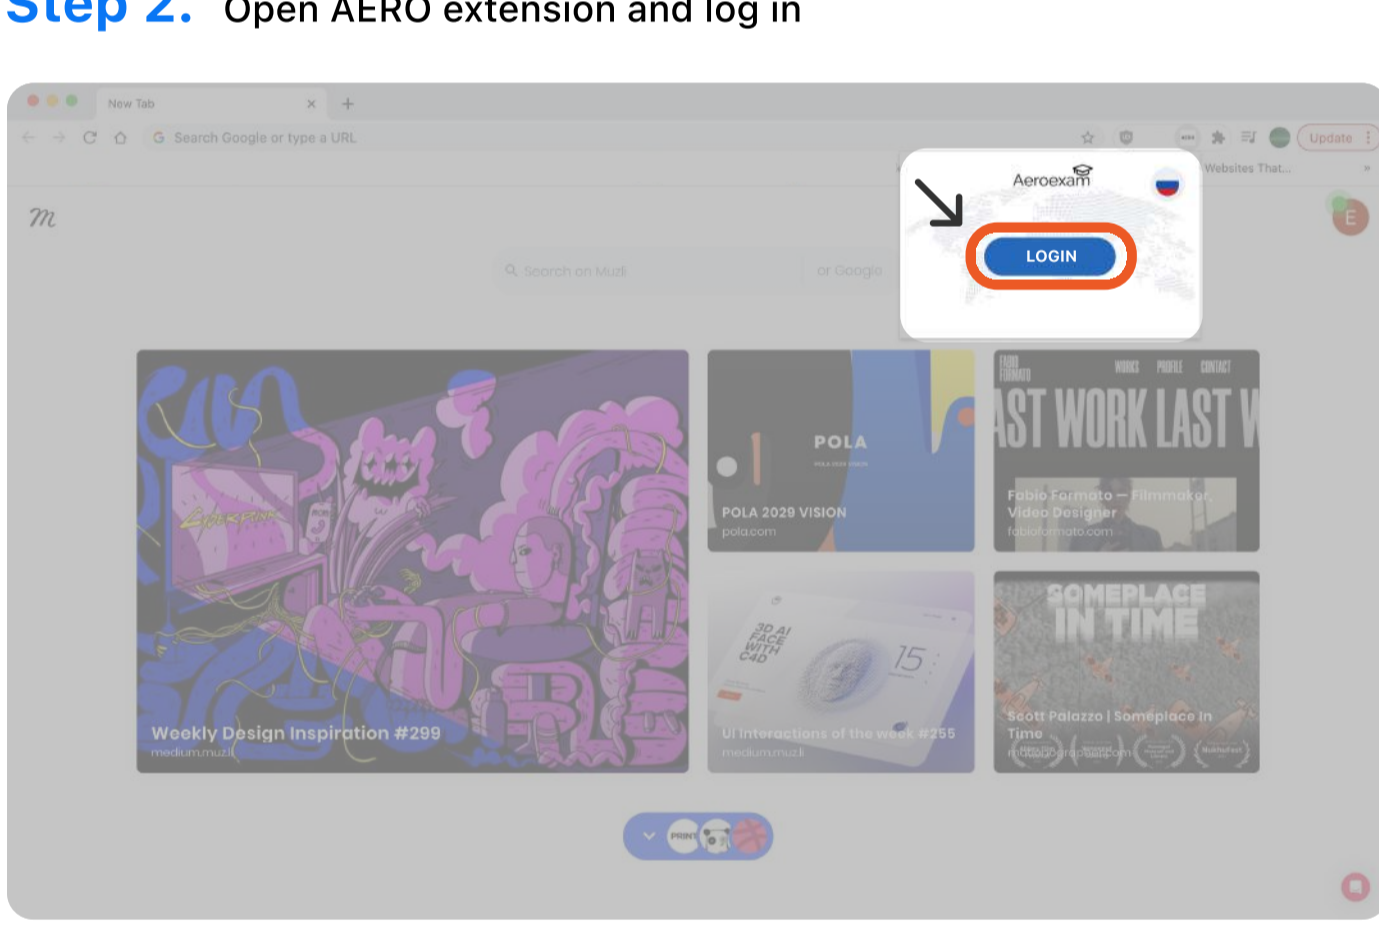

AERO extension is added

Step 1. Log in to your Moodle account

Step 2. Open AERO extension and log in

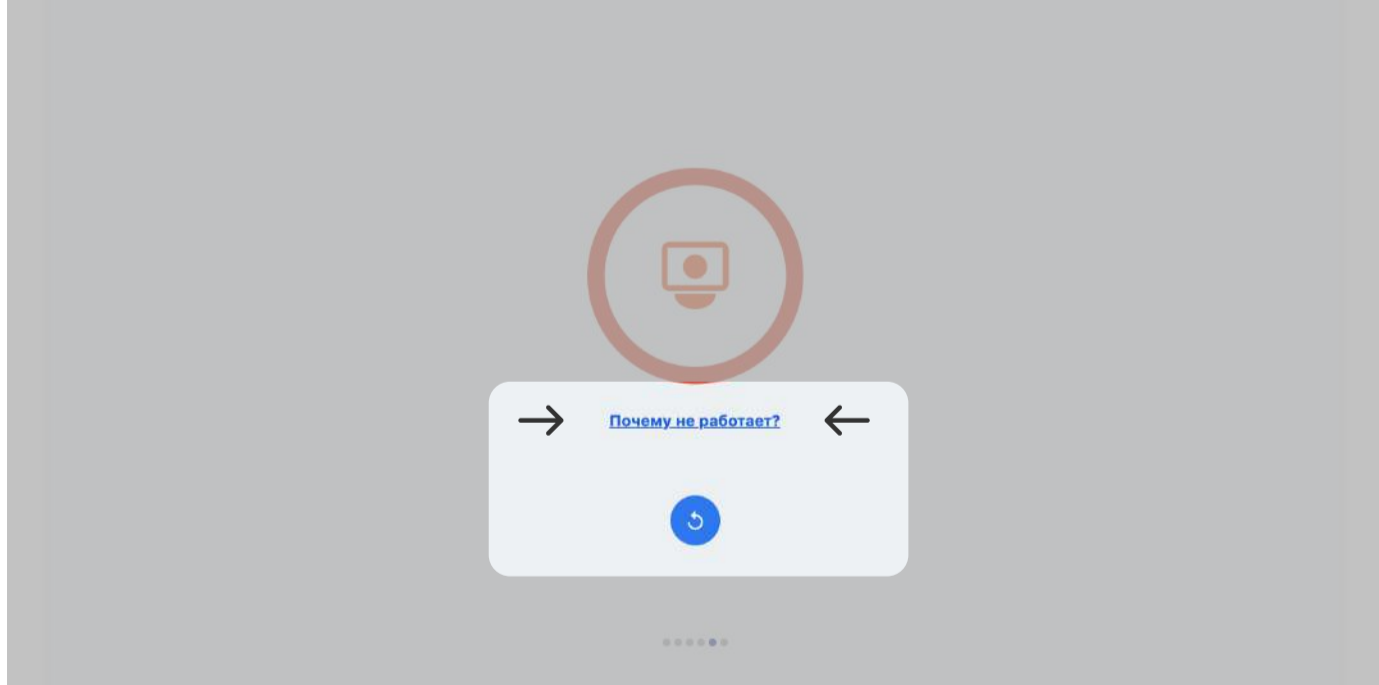

Step 3. Follow the instructions in the extension

Step 4. Equipment (camera, microphone, etc.) is checked automatically.

Just follow the instructions described on the page

Step 5. If the testing was successful, return to extension to start exam

If the check fails, follow the instructions on the link on the page

Step 6. Add a photo for identification to the exam

If you later want to change your profile photo, click on the camera icon in the menu ()

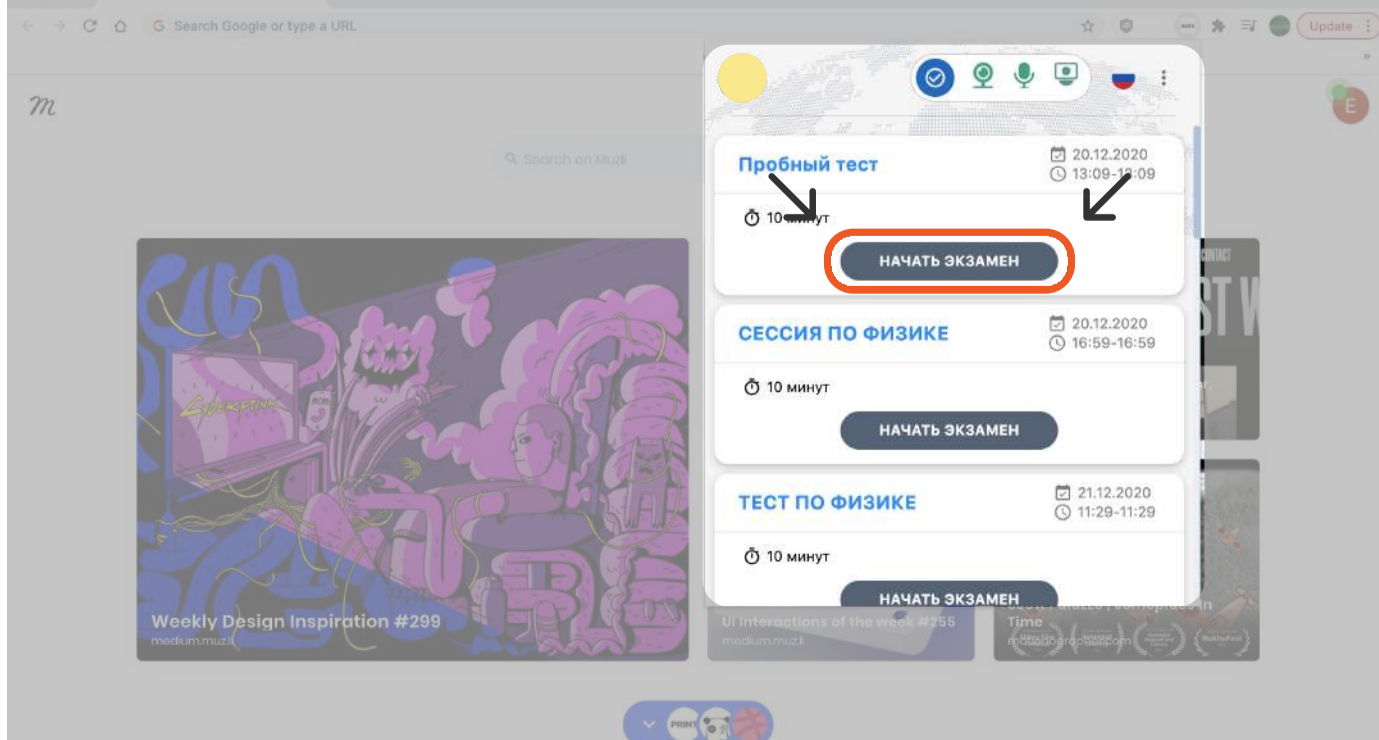

If the photo **really** shows you, then the system will give permission to change the photo

If the system **does not give permission**, then the photo is sent to your teacher for manual confirmation

Step 7. Select exam you want to take and click on 'Start exam' button

An automatic equipment and student identification will be carried out prior to the start of the exam

Step 8. Complete the exam in the Moodle itself.

Congratulations, you passed the exam!
